

EDUCATION OF YOUTH IN THE SPIRIT OF MILITARY PATRIOTISM

Mirzayev Timur Alfirovich,

Deputy Head of the Faculty of Military Education of the Nizomi TDPU

Annotation:

In this article, the young generation in our country to the Motherland about educating in the spirit of love, forming a sense of patriotism in young people it is about concepts, views.

Key words: patriotism, art, aesthetic needs, cultural and educational Activity

To spiritual and educational work after our country gained independence began to be considered as one of the important priority issues of our state policy. Since the beginning of the winds of independence in our country, people's minds, huge changes appear in the worldview, thinking, goals and aspirations, in a word, in the spiritual-ideological world, in the spiritual nature and even in the image started. Because independence is the gateway to freedom, nationalism, and patriotism opened and started people towards goodness. The head of our state Sh. Mirziyoyev – Independence patriotism, national traditions and values of youth in our country to educate in the spirit of respect, spiritually mature and physically healthy generation certain about bringing them to adulthood, protecting their rights and interests things are done. At the same time, the situation in the field and the implemented measures topical issues that concern a wide range of young people, especially creating suitable conditions for unorganized youth to find their place in life, to support them in every way, guide them to the profession and ensure their employment, due to the fact that work on the promotion of initiatives is not organized at the level of demand is a clear task about what we should do in this regard and gave instructions. At the heart of these words, we still have a lot to do in this area. Life itself proves that we have to do many things. - To our goal to achieve the building of a new democratic society, the fate of reforms to what force what cultural and professional level our young people have what he has achieved, what ideas he believes in, and how spiritually it depends on its enrichment," said Islam, the first President of the Republic of Uzbekistan Karimov. Therefore, increasing access to information for young people, national educating a new generation capable of realizing the idea of universal human recovery is one of our most important tasks. That is why today the Uzbek people

universal spirituality and national values formed over the centuries Imbibing is important in raising young people to be patriotic and well-rounded people earns. Educating the young generation in our country in the spirit of love for the Motherland is considered as one of the main issues of culture and art. Because, culture and art are an important and integral part of the life of society, it is a person has the ability to have a strong influence on the psyche.

When it comes to national patriotism, it is in the blood of the Uzbek people faith, honesty, love, consequence, passion, honor, to the motherland, to one's own country Loyalty is understood as a set of moral and spiritual values, ideas, views. Forming and educating the sense of patriotism in educational institutions constitutes the main content of education. Patriotic feelings state symbols of Uzbekistan, flag, coat of arms, anthem, Uzbek language,

The Constitution and other feelings appropriate to this nation, this land, qualities are reflected in cultural and educational activities. Young people that the issue of educating in the spirit of patriotism is one of the issues at the state level therefore, clearly planned road maps for such purposes are defined the goal is to implement the work consisting of tasks is appropriate.

On the topic of patriotism, many examples of creativity and opinions of our scientists and scholars have reached us. Amir Temur, Alisher Navoi, The work of Muhammad Zahiriddin Babur, Mirza Ulugbek and other ancestors its examples are still present, that is, in our time, it has a special place and is used as an example in the education of young people.

Everyone interprets the concept of homeland in different ways, at their own level of understanding does. This is the place where a person is born, where the blood of the navel is shed, the period of childhood and youth it is a place where he passes, gets education, travels and stays. Motherland to love, to serve for his prosperity, to protect him from the evil eye and dark forces to protect, to protect his honor - all this is yours and ours is one of the responsible tasks before us. The concept of the homeland, loving it, the feeling of honor and protection is not only in humans, but also in the animal world can be observed. A fish tends to water, an animal to its nest, an insect's nest. That's it Even non-thinking creatures and insects recognize their home, build it, he lives in it with his partner, continues his offspring, and protects him when necessary. So He was gifted with intelligence and thought, and was the best of all beings in existence and in a person, this feeling should be highly developed. With intensity the scope of the work carried out in our country during the period of development is expanding day by day. The

efforts of the head of our state, with his initiatives, an unprecedented level of development in the life of our country We are witnessing its steps. Peaceful living of people, protecting their interests, bringing our country to the world arena, and its reputation raising, in the words of the President, in the way of "pleasing the people". All the works and reforms are important strategic in the development of our society is considered as an issue. Actions for the further development of Uzbekistan

It is also in this country within the context of the five priority areas defined in the strategy to meet the material and spiritual needs of our living people, their improvement of a prosperous lifestyle, the prestige of our country in front of the world community, reputation and other issues. Do such great things The self-sacrifice of people with a strong sense of patriotism is of great importance is enough. "Watan" is derived from the Arabic word "Motherland". Homeland is the place where the umbilical cord blood of a person was shed, the place where his descendants and ancestors were born, social means environment and man, his life and spiritual concepts. -Patriotism - means loyalty to the Motherland, service to it, preservation of the country's peace, prosperity of the Motherland spiritual and moral qualities that encourage to be active are understood. Patriotism is love for the land inherited from our ancestors, the country's past and future, preservation and development of folk traditions, songs, and values

means" The issue of youth education is the most important of our state's policies today is one of its strategic tasks. Education of young people and their personality All general education schools are responsible for all-round development. This tasks to develop all abilities in students, to create creative aspirations is considered to be the main factor. Advanced ideas are happening in our time explanation of changes, as well as historical topics in a modern spirit son and It is a rich resource for raising girls' ideological beliefs and spiritual outlook is considered Only then will it have an emotional impact on the soul of the young generation strong national education that nurtures courage, bravery, and initiative in them The concept of patriotism is often related to military activities is used. In one respect, this is true. But we only have this feeling if we use it in relation to the military, we are using it in the narrow sense of patriotism. It is appropriate to see patriotism in all activities. To hold meetings with our compatriots who received the "Brave Boys" state award, to widely promote their achievements and results among young people; special importance is attached to the step-by-step organization of military-sports games "Heirs of Temurbek" with

the participation of high school students. The third stage (adolescents aged 16-18) is aimed at ensuring mental and physical readiness of young people to serve the Motherland and its protection. At this stage, in addition to the above tasks, attention is paid to the following issues: preparing young people for military service, forming their independent opinion and positive views on military service, strengthening their patriotic feelings; in order to enrich the theoretical and practical knowledge and skills of students, to organize various meaningful and interesting events in cooperation with departments of defense affairs and military units, self-governing bodies, state and public organizations; to provide detailed information about the need for physically strong and intellectually mature youth for our national army, the importance of military service, and the reforms being carried out in the Armed Forces. The fourth stage (ages 18-30) involves improving the physical and spiritual abilities, leadership skills and intellectual potential, general and professional skills of young people, encouraging them to regularly work on themselves, lead a healthy life and achieve this. holds At this stage, it is necessary to pay attention to the following aspects: to further enrich the imagination and knowledge of the importance of raising the young generation to be mature in all respects, people with high intellectual and spiritual potential, loyal to their parents and the Motherland; To be always ready for the defense of the homeland and to be proud of the young people serving in the Armed Forces, to form feelings of loyalty to the constitutional duty and military oath; adapting to the conditions of military service and carefully mastering military specialties, being ready for any difficulties, strengthening the qualities of courage and courage, developing the skills of preserving weapons, military equipment, state and military property; formation of qualities such as regular improvement of combat training and military skills, appreciation of mutual support and friendly relations established in the military team; widely promoting reading, inculcating the role and importance of artistic works in the minds of young people in establishing high spirituality in society; close support for young people to master their chosen profession and become mature specialists; to strengthen a critical view and ideological immunity against foreign ideas that contradict our national ideology, self-confidence, vigilance and awareness; to form in young people the qualities of an active life position and the ability to clearly express their independent opinions, to feel responsibility, to observe strict order and discipline, to teach them to be persistent. The effectiveness of

educating young people in the spirit of military patriotism is first of all determined by the extent to which this process has a positive effect on the upbringing of a mature generation and the level of patriotism of young people.

An important condition for determining the level of effectiveness in military-patriotic education is to regularly take into account and analyze the factors that positively affect the further development and improvement of qualities such as patriotism, military duty, and loyalty to military traditions in young people. One of the important criteria of education in the military-patriotic spirit is determined by the extent to which the demands placed on the young generation by the society are proportional to the meaning, form and methods of the educational work carried out in this regard. This concept serves as a methodical basis for increasing the effectiveness of military-patriotic education among young people, increasing their high spiritual and moral qualities, citizenship position, knowledge and skills aimed at loving the Motherland and protecting it like the apple of an eye. does.

The implementation of the concept allows to increase the sense of patriotism of the citizens of the Republic of Uzbekistan, to fill the ranks of our national army with young people who have modern knowledge and professional skills, strong will, and active citizenship. This Concept is based on the principles of openness and transparency, and state and non-state organizations, civil society institutions, and all our compatriots can participate in its improvement with their suggestions and recommendations.
